ABOUT ME

I'm an iOS developer with nearly 5 years of experience building high-quality mobile and tvOS applications. I specialize in creating scalable, high-performance solutions and have delivered apps used by thousands of users, focusing on clean architecture, performance optimization, and intuitive user experiences.

PROFESSIONAL EXPERIENCE

Invotyx, iOS Developer 07/2022 – Present | Islamabad, Pakistan

- Served as the team's go-to iOS problem solver, proactively diagnosing and resolving complex technical issues, unblocking development, and ensuring smooth delivery across projects.
- Provided hands-on technical support and mentorship to team members, troubleshooting bugs, optimizing performance, and maintaining high code quality standards.
- Acted as a key contributor in tackling critical challenges, from debugging edge cases to stabilizing production issues, helping the team ship reliable and scalable applications.

AppsKottage, iOS Developer 07/2020 – 03/2021 | Islamabad, Pakistan

- Developed iOS applications using Swift and UIKit, building user interfaces programmatically with a focus on performance and scalability.
- Collaborated with backend team for feature integration.
- Fixed bugs and improved app performance.

EDUCATION

Bachelor of Science in Computer Science, PMAS-Arid Agriculture University Rawalpindi 01/2018 – 01/2022 | Rawalpindi, Pakistan

- 3.6 CGPA

SKILLS

Technical Skills: UIKit | Swift | SwiftUI | tvOS | Flutter | MVVM | CallKit | PushKit | In-App Purchases | GitHub | Twilio | Telnyx | Firebase | AVFoundation | Unit Tests | Objective-C | Testflight | NetworkExtension | AVKit | Core Data | StoreKit | App Store Submission

PROJECTS

Orion AI - Chatbot Assistant

This application is an AI-powered chat platform that delivers real-time, streaming responses to provide a smooth and interactive conversational experience.

- Key Features & Tech: SwiftUI, UIKit, StoreKit, WebKit, AVFoundation, Photos, PhotosUI, PDFKit, Firebase Analytics, Firebase Crashlytics, Firebase Remote Config, RevenueCat, Google Sign-In

Apotheka

Apotheka offers two apps, one for doctors and one for patients. Doctors can set availability slots, manage appointments, and conduct video calls.

- Key Features & Tech: UIKit, Twilio Video Calling, Authentication, APIs Integration

VPN Express : Fast, Secure VPN

Developed a custom VPN application using WireGuard protocol integrated with NetworkExtension framework.

- Key Features & Tech: Swift, WireGuard, NetworkExtension, StoreKit 2, RevenueCat, Alamofire, Firebase (Analytics, Crashlytics, Remote Config), Unity Ads, Speed Test API

Kids Tube for YouTube

Kidstube for YouTube is an app for kids on Apple tvOS.

- Key Features & Tech: In-App Purchases (Auto-renewable Subscription), Customized Video Player with Suggestions, Profile Creation

Anwaar UI Furqaan

Comprehensive religious application designed for Muslims with Quranic Tafseer and Qibla direction.

- Key Features & Tech: Quran Translation, Flutter, SQLite, UIKit
- Additional Info: Developed from scratch using Swift, then migrated to Flutter per client request.
